

Exercise on File References

The diagram below represents a folder structure of a set of web files. The arrows indicate which items are contained within a particular folder. For example, the file **quiz.html** is contained inside the **project** folder.

Reference examples

reference to the **globe.jpg** file:

`/images/globe.jpg` ←note slash at beginning of root-based reference

Relative reference to the **main.css** file if the current page is **quiz.html**:

`../main.css`

Relative reference to the **globe.jpg** file if the current page is **home.html**:

`images/globe.jpg`

Reference questions

1. What is the root-based reference to the **home.html** file?

/home.html

2. What is the root-based reference to the **author.jpg** file?

/project/images/author.jpg

3. What is the root-based reference to the **banner.jpg** file?

/images/banner.jpg

4. What is the relative reference to the **home.html** file if the current page is **bio.html**?

home.html

5. What is the relative reference to the **bio.html** file if the current page is **survey.html**?

../bio.html

6. What is the relative reference to the **decal.jpg** file if the current page is **home.html**?

project/images/decal.jpg

7. What is the relative reference to the **author.jpg** file if the current page is **survey.html**?

images/author.jpg

8. What is the relative reference to the **logo.jpg** file if the current page is **quiz.html**?

../images/logo.jpg
