

NORTHWESTERN
UNIVERSITY

Seminars in Translational Imaging Informatics

Accelerating the Algorithm to the Application

Seminar #1

Thursday, May 18, 2006

6:00 PM

676 North St. Clair, Suite 800, Chicago, IL 60611

Topics

1 – Opportunities in Translational Imaging Informatics

David S Channin MD

Associate Professor of Radiology

Chief, Imaging Informatics

2 – Image post-processing and analysis needs in Cardiac CT and MR

James C Carr MD

Assistant Professor of Radiology

Chief, Cardiovascular Imaging

3- Open Discussion

All Participants

A light supper will be provided

Please RSVP (for a head count) to David S Channin
(dsc@radiology.northwestern.edu) by May 1, 2006

Seminar #2, Thursday, June 15, 2006

The **Seminars in Translational Imaging Informatics lecture series** is designed to bring together clinical radiologists (and their residents and fellows) with image post-processing and analysis needs with basic scientists (and their students) in electrical engineering and computer science who develop algorithms for image post-processing and analysis. Each month, one computer scientist and one clinical radiologist will present their work and needs. The goal is to accelerate the development, evaluation and use of medical image post-processing
